

BEFORE THE FEDERAL COMMUNICATIONS COMMISSION

In Re: Delete, Delete, Delete

**GN Docket No. 25-133
DA 25-219**

**COMMENTS IN SUPPORT OF THE FEDERAL COMMUNICATIONS COMMISSION
REVOKING SECTION 73.525 CHANNEL 6 TELEVISION STATIONS PROTECTIONS**

To the Commission:

My name is Robert Taylor, and I have been the Executive Director/General Manager of multiple non-commercial radio licenses for thirteen years. Pursuant to the above-referenced Public Notice released on March 12, 2025, I respectfully submit these comments regarding 47 C.F.R. § 73.525.

Section 73.525, which currently requires the protection of channel 6 television stations by full power FM stations, should be deleted. Section 73.525 is an antiquated rule that is grounded in the analog world. There is no evidence that the propagation curves or interference ratios have any applicability for digital television. This rule requires many non-commercial band stations to operate vertical only, which reduces their ability to serve their licensed protected contours, especially in rough terrain.

I respectfully request that the Commission eliminate this rule, as it imposes unnecessary burdens without any proof of benefit in this modern world.

April 2, 2025
